⌄ 앱 심사 2023년 2월 3일 오후 7:16

Guideline 2.1 - Information Needed

We're looking forward to completing our review, but we need more information to continue. Your app uses the AppTrackingTransparency framework, but we are unable to locate the App Tracking Transparency permission request when reviewed on iOS 16.3.

Next Steps

Please explain where we can find the App Tracking Transparency permission request in your app. The request should appear before any data is collected that could be used to track the user.

If you've implemented App Tracking Transparency but the permission request is not appearing on devices running the latest OS, please review the available documentation and confirm App Tracking Transparency has been correctly implemented.

If your app does not track users, update your app privacy information in App Store Connect to not declare tracking. You must have the Account Holder or Admin role to update app privacy information.

Resources

- Tracking is linking data collected from your app with third-party data for advertising purposes, or sharing the collected data with a data broker. Learn more about tracking.

- See Frequently Asked Questions about the requirements for apps that track users.

- Review developer documentation for [App Tracking Transparency](#).

2.1.0 Performance: App Completeness

⌄ **앱 심사** 2023년 2월 3일 오후 8:49

Hello,

The issues we previously identified still need your attention.

If you have any questions, we are here to help. Reply to this message in App Store Connect and let us know.

Guideline 2.1 - Information Needed

We still need more information to continue. Your app uses the AppTrackingTransparency framework, but we are unable to locate the App Tracking Transparency permission request when reviewed on iOS 16.3.

Next Steps

Please explain where we can find the App Tracking Transparency permission request in your app. The request should appear before any data is collected that could be used to track the user.

If you've implemented App Tracking Transparency but the permission request is not appearing on devices running the latest OS, please review the [available documentation](#) and confirm App Tracking Transparency has been correctly implemented.

If your app does not track users, update your [app privacy information in App Store Connect](#) to not declare tracking. You must have the [Account Holder or Admin role](#) to update app privacy information.

I really appreciate the review. I found that "Privacy - Tracking Usage Description" was missing in the Info.plist file. So I've tried to solve this issue as shown in the attached screenshot. Please check again.

After I got previous rejection, I've tried to solve the problem by using dispatchqueue.main.asyncafter to slightly delay the display time of the App Tracking Transparency message. Please check again, thank you!
